The Mount Sinai Hospital has received its third consecutive Magnet Recognition Program® designation

Reflections of Mount Sinai Nurses

MSH Magnet Survey Statistics DID YOU KNOW?

We thank the more than 6,000 individuals, especially the nursing staff, from Tho Sinai Hospital and Mount Sinai Nurses who participated in the recent site surveys. Magnet Designations is an unparallel honor that recognizes a culture of caring, collaboration, and exemplary nursing practice. This would not have been accomplished without countless displays of excellence, every day, by nurses, physicians, and the members of the health care team who are dedicated to improving patient care.

We live and breathe Magnet in every patient interaction. A Magnet Nurse knows the care they provide is related to quality and outcomes, but instinctively understands the importance of human interaction. Every Mount Sinai Nurse should feel tremendously proud of the care we provide. We believe they left with the understanding that our documents were unable to completely capture all the magic we make happen each and every day. We are excellent outcomes, but we are also so much more.”

The best part of my experience as a Magnet Escort, was being involved in the Magnet Survey Command Center.

Nurses and Patient Care Associates, Palliative Care Unit

As the MSH Chief Nursing Officer I am extremely proud to work with our excellent Community of Magnet Nurses and our entire healthcare team. The Magnet Appraisers shared their thoughts about their most valued survey experiences which include:

• Tremendous level of interdisciplinary collaboration

• MSH Relationship Centered Care model….. one of the best nursing professional practice models in the country.
